

PROBLEM STATEMENT:

All colleges should offer a practical selection of nighttime courses to help with students who are working jobs and/or also those who thrive during the latter half of days. Many students often face the realities of life, where other things take a higher priority during the daytime and put a constraint on their life, such as work schedules and other obligations where this decreases their academic performance overall. Offering a fully fleshed out nighttime alternative for course selections at night is a step in the right direction as it is more inclusive and it gives students a much more tailored experience along with agency.
